

INTERNSHIP PROGRAM:

We are proud to offer an internship program at Independence Equine and Small Animal Clinic. After completing our internship program we are confident you will have the knowledge and experience to choose your career in the veterinary field. Our internship program gives you the opportunity to work with our equine veterinarian as well as our small animal vets. We hope that upon completion of our internship program you have a better understanding of veterinary medicine.

It is our hope that you will leave Independence Equine and Small Animal Clinic internship program with valuable information in a variety of clinical experiences.

EXPECTATIONS:

Our every effort is made to ensure that our patients are given the top quality care as well as a positive experience on your part. You are being trusted as an intern to follow the guidance and instruction of the doctor you are working with. Our technicians on staff will be administering most of the daily medications to our patients, but as an intern you will be expected to assist them and in addition discuss your findings with the doctor on the case.

We will schedule interns to allow time spent in all areas; surgery, medicine (small animal & equine) and equine reproduction. However, if you have a particular interest, please make us aware of that so that we can focus and enhance that area for you. In an effort to make sure you work with each veterinarian, we will have a rotational schedule for you.

As an intern, you will be expected to rotate a schedule for after hour emergencies. We expect complete professionalism as you will be an extension of our hospital. You will assist the veterinarian on call in handling emergencies.

You will be expected to complete rounds on every patient in the hospital. Make notes of your findings and turn each into the veterinarian on the case. Upon completion of rounds there will be case discussion; take this opportunity to ask questions, discuss findings, etc...

INTERNSHIP APPLICATION
